## Oklahoma Cotton Forecast Up From Last Month

### Oklahoma:

Cotton production is forecast at 300,000 480-pound bales, up 3 percent from last month and 48 percent above last year. An average yield of 873 pounds per acre is expected from 165,000 harvested acres.

Utilized pecan production in Oklahoma is forecast at 20 million pounds, unchanged from the October 1 forecast but 18 percent above last year's output of 17 million pounds. Improved pecans comprised 6 million pounds while native and seedling pecans accounted for 14 million pounds.

### United States:

All cotton production is forecast at 19.0 million 480-pound bales, up 1 percent from last month but down 12 percent from last year's 21.6 million bales. Yield is expected to average 864 pounds per harvested acre, up 5 pounds from last month and 50 pounds above 2006.

The December 1 forecast for 2007 pecan utilized production is 334 million pounds (in-shell basis), up 4 percent from the October 1 forecast and 62 percent from last year's crop.

Dear Friends in Agriculture:

From the entire staff and data collection team of the Oklahoma Field Office, we would like to extend our warmest wishes to you and your families for the holiday season.

I will be starting my second year as State Director of the Oklahoma Field Office in February 2008. The State was in a severe drought during my first year, and we nearly got washed away this past year. Being a Statistician, I would expect this year to be average when considering the past two years. I continue to enjoy the great opportunities to meet and visit with the many new friends and colleagues I have met across the State.

My special thanks to the numerous agricultural producers and agri-businesses that take the time to assist us with the variety and frequency of surveys that we conduct each year. Without your assistance and continued support, we would not be able to provide our service of accurate and timely agricultural statistics for Oklahoma.

We also could not provide our quality service without the support and assistance of our friends and colleagues at the Oklahoma Department of Agriculture, Food and Forestry, Oklahoma State University, OSU County Extension offices, USDA county offices, and other local, state, and federal offices that work cooperatively with us throughout the year.

I thank you all very much for your continued support. We wish you all a very Happy Holiday Season!

Sincerely,

A handwritten signature in black ink, appearing to read "Wilbert C. Hundl, Jr.". The signature is written in a cursive, flowing style.

Wilbert C. Hundl, Jr.  
Director, USDA-NASS  
Oklahoma Field Office

## Average Prices Received by Farmers, Oklahoma and United States, November 2007 with Comparisons
